Briggs & Stratton Small Engine Specifications

I am considering buying a LumberMate 2000 (my first mill, but I have used a smaller engine Norwood before) and want to get feedback on which of the 20+ hp engines to buy. I have had good experience with Honda engines in the past, but don't want to overlook the extra hp of the Briggs for the same price. Any opinions? Thanks.

The torque for the Vanguard is 53 ft. lbs., while the torque for the Kohler is 63 ft. lbs. Nearly same rpm for max torque values. Does anyone know how Kohler can get 10 more ft. lbs of torque at virtually the same horsepower? Also, does anyone have experience with either of these size hp engines as far as reliability/issues?

Torque Disparity Kohler vs. Briggs | Arboristsite.com

Revision, to rate the horsepower output of their engines. The SAE International J1940 Standard was revised in October 2012 to provide a single method for determining small engine power and torque. This also allows us to accurately compare the power and torque of various engines.
