An Introduction to Geographic Information Technology ...

A geographic information system (GIS) is a particular type of information technology that can help us understand and relate to the "what," "when," "how," and "why" of the world by answering "where.". Geographic information systems are indeed about maps, but they are also about much, much more. A GIS is used to organize, analyze, visualize, and share all kinds of data and information from different historical periods and at various scales of analysis.
