I have a 2013 Mazda 3 that will not start. When I turn the key it cranks but will not turn over. It sounds like it's going to run, but then cuts off. I just replaced the battery because it had a dead cell. Thought (hoped) that was the issue, but it's still doing it. I will try to start, it won't "catch" so I turn it off.

Is it so automated in mazda 3 that car wont start? Well No, the model which I have at-least does not have this automatic feature to stop the car engine immediately, you need to be careful about the engine oil pressure level, and if you see the warning signal on your dashboard, stop the car immediately (what the service center guy suggested me)
