5 Obvious Principles of Human Nature That Baffle Liberals

Human nature is a concept that denotes the fundamental dispositions and characteristics—including ways of thinking, feeling, and acting—that humans are said to have naturally. The term is often used to denote the essence of humankind, or what it 'means' to be human. This usage has proven to be controversial in that there is dispute as to whether or not such an essence actually exists.

This chapter develops and defends four claims about Kant's theory of truth. The first is that Kant holds that 'the accordance of my cognition with its object' is the strictly and analytically correct, yet metaphysically and epistemologically neutral, explication of the concept of truth. Second, that the idea of a 'real definition' of truth is equivalent to Kant's notion of a criterion ...
