Chapter 1 Measure on a σ -Algebra of Sets 1. Limits of sequences of sets Definition 1 Let $(A_n)_{n \in \mathbb{N}}$ be a sequence of subsets of a set X . (a) We say that (A_n) is increasing if $A_n \subseteq A_{n+1}$ for all $n \in \mathbb{N}$, and decreasing if $A_n \supseteq A_{n+1}$ for all $n \in \mathbb{N}$. (b) For an increasing sequence (A_n) , we define $\lim_{n \rightarrow \infty} A_n := \bigcup_{n=1}^{\infty} A_n$. For a decreasing sequence (A_n) , we define $\lim_{n \rightarrow \infty} A_n := \bigcap_{n=1}^{\infty} A_n$.

MEASURE and INTEGRATION Problems with Solutions

This volume develops the classical theory of the Lebesgue integral and some of its applications. The integral is initially presented in the context of n -dimensional Euclidean space, following a thorough study of the concepts of outer measure and measure. A more general treatment of the integral, based on an axiomatic approach, is later given. Closely related topics in real variables, such as ...
